Laboratory Exercise #	2 (Functions and Objects)	Date	
Name		Section	

Project Name / File Name: LE2_SurnameFirstNameInitial.zip (e.g. LE2_ResuelloG.zip)
In your MyMapua drive "**IT135-8L**" repository, create a folder named "LE2" where you will upload your submission for this laboratory exercise. In Blackboard, only submit the link to the LE2 folder. Make sure you enabled access settings.

1. Write an HTML document *checkout.html* to create a form with the following capabilities:

   a) Three text boxes to collect user's name, contact number, and shipping address.
   b) Display ten items of your choice with an image of each product, product name, price, and quantity to be purchased.
   c) A dropdown of discount privileges: Student, Senior Citizen, PWD, None
   d) A collection of three radio buttons that are labeled as either Visa, Master Card, GCash.
   e) Submit button

2. Write a PHP script *summary.php* that summarizes the shipping details, lists the order details in a table, and computes the subtotal, value added tax (12%), shipping fee (Php 45), discount (Student: 10%, Senior Citizen & PWD: 20%), and the total amount due. Note that Senior Citizen & PWD are also entitled to tax exemption. Make sure to implement OOP in your code.

3. Add the two files in a zipped folder, with the name indicated above.

Laboratory Exercise Score Sheet

1	Intelligent naming of variables and use of comment	10	
2	Layout and Design of Screen	20	
3	Correct use of functions and OOP	30	
4	Correct output	30	
5	Correct filename	10	
	Total	100
